Transmission Type: Sales & Pricing Trends

Conclusion

- Toyota and Hyundai dominate the market with the highest sales share, while BMW and Mercedes retain premium positioning despite lower volume.
- Petrol and Diesel remain leading fuel types, but EV adoption (~10%) is accelerating, with Tesla as the frontrunner.
- SUVs and EVs show the lowest depreciation and highest long-term profitability.
- Automatic transmissions are rapidly gaining demand, especially in urban and premium segments.
- Market trends indicate a shift toward value-driven, fuel-efficient, and technologically advanced vehicles.
